OBJECTIVE

To drive impactful business outcomes by architecting, building, and delivering innovative, scalable software solutions. I aim to leverage my deep software engineering expertise, creative problem-solving skills, and enthusiasm for emerging technologies—while continuously learning new things—to solve complex challenges and accelerate organizational growth and success.

ROLES & RESPONSIBILITIES

- Architecting, designing, documenting, implementing, and maintaining mission-critical, high-volume, and low-latency applications, ensuring exceptional reliability, scalability, and performance in complex enterprise environments.
- Leading and mentoring teams, driving story assignment, sprint planning, scrum leadership, cross-functional coordination, and fostering a culture of innovation and collaboration with dependent engineering groups.
- Designing and implementing advanced autonomous AI agent systems with multi-step reasoning, dynamic tool-calling, agent orchestration, and workflow automation, including RAG, memory architectures, multi-agent communication, and LLM-powered business logic.
- Delivering production-ready agentic and AI-driven solutions with comprehensive guardrails, safety mechanisms, monitoring, logging, and performance evaluation frameworks, while guiding the adoption and research of cutting-edge AI techniques such as ReAct, chain-of-thought reasoning, toolformer models, and prompt engineering.
- Enforcing software engineering best practices to ensure efficient, maintainable, thoroughly tested, and secure code; championing continuous improvement through technical design reviews, introducing new technologies and solutions, and optimizing development processes.
- Leading cloud infrastructure provisioning, cost optimization, performance validation, and secure deployment on AWS/Azure/GCP to achieve high availability, scalability, and operational excellence.
- Conducting architecture reviews, technical due diligence, and platform modernization to improve overall system reliability and future-readiness.
- Collaborating with product management, UX/UI teams, and external vendors to drive feature development, troubleshoot complex issues, and deliver robust end-to-end solutions on schedule.

AREAS OF INTEREST

- Artificial Intelligence, Agentic AI, Generative AI, Machine Learning, Deep Learning, and Autonomous Multi-Agent Systems.
- Development of advanced data structures and optimization of algorithmic performance in terms of time and space complexity.
- Retrieval-Augmented Generation (RAG), prompt engineering, and MCP Servers.
- Scalable distributed systems, cloud-native architecture (AWS, Azure, GCP), and edge computing for intelligent applications.
- Desktop, Web, and Mobile application development with a focus on user experience and efficient, modern frameworks.
- Human-AI collaboration, natural language processing, and computer vision.

EMPLOYMENT & PROJECTS

Senior Software Engineer at Intuit

Sep 2024 - Present

- Led the implementation of an ML-powered **Quote Recommendation System** that boosted quote-to-win conversion rates by **25%** and average order value by 20% for a multi-billion dollar sales platform. Reduced sales cycle time by 18% and manual quote adjustments by over **40%**. Enabled dynamic pricing, targeted product bundles, and **\$100M+** in incremental annual revenue, with 95% sales team adoption and a 30% improvement in forecasting accuracy. Tech stack: Python, Numpy, Pandas, TensorFlow, scikit-learn, MLflow, Airflow, AWS Sagemaker and Databricks.
- Developed **Quote-Service** from scratch, Central orchestration microservice for Intuit's CPQ platform, orchestrating DealHub interactions and managing quote data in DB. Provides unified REST/GraphQL APIs for downstream systems with **99.99%** availability and 100ms latency. Built with Java, Spring Boot, Redis, Hibernate with JPA and GraphQL/REST APIs, ReactJS, Kubernetes and AWS.
- Developed **Quote-Async** from scratch, Event-driven microservice powering Intuit's CPQ data pipeline, processing Quote CDC events and transforming quote data into enterprise-grade clean entity models published to Kafka. Engineered guaranteed consumption, intelligent deduplication, and event ordering mechanisms ensuring zero data loss for critical downstream systems for Analytics and Marketing teams. Built with Java, Spring Boot, PostgreSQL, Kafka, Kubernetes and AWS.

Senior Software Engineer at Walmart Labs

July 2022 - Sep 2024

- Engineered the **Columbus-Foundation-App**, a robust seller management solution for Walmart marketplaces, provides write API's for managing seller/product data. achieving **sub-100ms** response times at **25K+** TPM. Utilized Spring Boot, microservices, Apache Kafka, GraphQL, CosmosDB, and rigorous testing (JUnit5, Mockito) to ensure exceptional scalability, reliability, and integration.
- Engineered the **Columbus-Read-App**, a high-throughput microservice delivering seller data to 100+ consumer teams at **50K+** TPM with sub-100ms latency. Leveraged Java, Spring Boot, Kafka, CosmosDB, GraphQL, Memcached, Kubernetes, Spring Security (OAuth2), Docker, JUnit, Mockito, and JMeter to ensure scalability, security, and reliability in a cloud-native environment.
- Designed and implemented adaptive **Multi-Factor Authentication (MFA)** logic to dynamically downgrade from 2FA to 1FA based on customer interaction patterns, enhancing user login experience and reducing authentication friction. Leveraged Spring Boot, MySQL, OAuth2, SSO and Spring Security for secure and scalable authentication workflows.

- Software Development Engineer - II at Zeta Suite

May 2021 - Jun 2022

 - Developed a high-performance **Recharge Service** for mobile and DTH plans, efficiently processing over 2 million transactions daily. Engineered end-to-end workflows using AngularJS for the frontend, NodeJS/ExpressJS as middleware, and Java Spring Boot microservices for business logic. Integrated Apache Kafka for scalable event-driven communication and MySQL for robust data storage. Implemented comprehensive validation, error handling, and notification features to ensure transactional reliability and a seamless user experience.
- Software Engineer - III at Walmart Labs

Nov 2020 - May 2021

 - Engineered the **Alerting-Application**, a comprehensive alerting and notification platform for real-time internal system monitoring and customer communication. The system features intelligent alert routing, multi-channel notifications, and robust processing pipelines, enabling timely resolution of issues and enhanced reliability. Leveraged ReactJS for the frontend, Java and Spring Boot for backend microservices, integrated with OracleDB for data management, and deployed scalable workloads on Azure.
- Senior Software Engineer at Nouveau Labs

Feb 2020 - Nov 2020

 - Developed DolphinVC, a multi-platform enterprise-grade video conferencing platform featuring secure authentication, meeting scheduling, instant meetings, and high-quality real-time video and audio streaming. Utilized ReactJS, WebRTC, WebSocket, Java, Spring Boot, OAuth2, Kafka, OracleDB, Docker, Kubernetes, AWS, RESTful APIs and Microservices architecture.
- Software Engineer at AllGoVision Technologies

Mar 2018 - Dec 2019

 - Developed the AllGoVision Analytics Platform and Alarm Center, delivering enterprise-grade solutions for real-time computer vision analytics and centralized alarm visualization, management, and response. Enabled 50+ advanced ML/DL/AI-powered features serving 2k+ clients worldwide, and enhanced situational awareness and operational efficiency. Leveraged modern microservices architecture and technologies including Java, Spring Boot, NodeJS, Angular, ReactJS, Kafka, OracleDB, MongoDB, Docker, Kubernetes, AWS, and RESTful APIs for high performance, scalability and reliability.

PERSONAL PROJECTS & BLOGS

- Personal AI/ML Projects:** <https://manju07.github.io/index.html#projects>
- Blogs:** <https://manju07.github.io/blogs.html>

TECHNICAL SKILLS

- Platforms/OS:** Windows (all), macOS, Linux, UNIX
- Programming Languages:** Java, Python, Node.js, JavaScript
- Frameworks & Libraries:**
 - Java/Backend:** Spring (Boot, Cloud, MVC, AOP, Security, OAuth), JPA (Hibernate), JUnit (Mockito)
 - Data Science/AI/ML:** NumPy, Pandas, Seaborn, scikit-learn, TensorFlow, PyTorch
 - Web/Frontend:** Express.js, AngularJS, React.js, Next.js, Jest, Bootstrap 4, jQuery, HTML5, CSS3
- Databases:** MySQL, PostgreSQL, OracleDB, MongoDB, Cassandra, Cosmos DB, DynamoDB, SQLite, HiveDB
- Cloud & DevOps:**
 - Cloud Platforms:** AWS, Azure, Google Cloud Platform (GCP), Heroku
 - Containerization & Orchestration:** Docker, Kubernetes
 - CI/CD & Automation:** Jenkins, GitHub Actions, CI/CD, Terraform
- Search & Data Processing:** Elasticsearch, Apache Solr, Apache Kafka, RabbitMQ, SQS, SNS
- Caching & Messaging:** Redis, Memcached, WebSocket
- AI/ML/GenAI Tooling:** LangChain, LangGraph, AgenticAI, CrewAI, MCP, Hugging Face, OpenAI Agents SDK, Qodo, ChatGPT, Google Gemini, Claude, OpenLlama, RAG
- Observability & Monitoring:** Grafana, Prometheus, SonarQube, Splunk, DynaTrace, Lenses
- APIs & Integration Protocols:** RESTful APIs, GraphQL APIs, WebSocket APIs, gRPC, OAuth2, SAML, SSO
- Developer Tools:** Cursor, WindSurf, VS Code, PyCharm, IntelliJ IDEA, Databricks, Postman, JMeter, JIRA, GitHub, Concord, BPMN Camunda

EDUCATION

Examination / Board	Institute	CGPA/Percentage	Session
B.Tech (Computer Science and Engineering)	MIT Manipal	6.64/10	Aug 2014 - May 2017
Diploma (Computer Science)	NTTF Dharwad	80.54%	July 2011 - June 2014
10th	R.L.S High School	81.12%	June 2010 - May 2011
